

Collis Solutions for Acquirers

Collis Test Tools are qualified or confirmed by Visa, MasterCard, JCB & other domestic schemes

World of Acquiring

Transaction acquiring and processing forms an integral part of the retail banking business. Reliable payment infrastructures are a must for banks to be able to offer services that live up to the high demands of today's consumers and merchants.

Collis ensures trust in technology so that you, as an Acquirer can rely on your technology as a solid foundation beneath your retail banking business.

Whether you are working with contact or contactless technology; migrating to EMV or confirming your infrastructure certifications; Collis has solutions which can be tailored for your needs.

Expert Consultancy

Comprehensive Consultancy is available from Collis to help Acquirers and Merchants in testing their terminals before going live. With extensive experience working with our partners over the years, Collis is equipped with the knowledge & expertise to support you.

Accredited Test Tools

Collis offers accredited test tools allowing you to validate the configuration of your EMV terminals according to Visa (ADVT), MasterCard (TIP) and domestic (e.g. C-TAP, Interac) specifications.

We also offer test tools to test the vital links in the payment infrastructure chain, simulate actual EMV cards, test Visa contactless terminals according to Visa Europe specifications, spy interaction between an EMV card and terminal to name a few. The result is a complete portfolio of test tools that test the vital components in an Acquirers' world.

In-depth Training

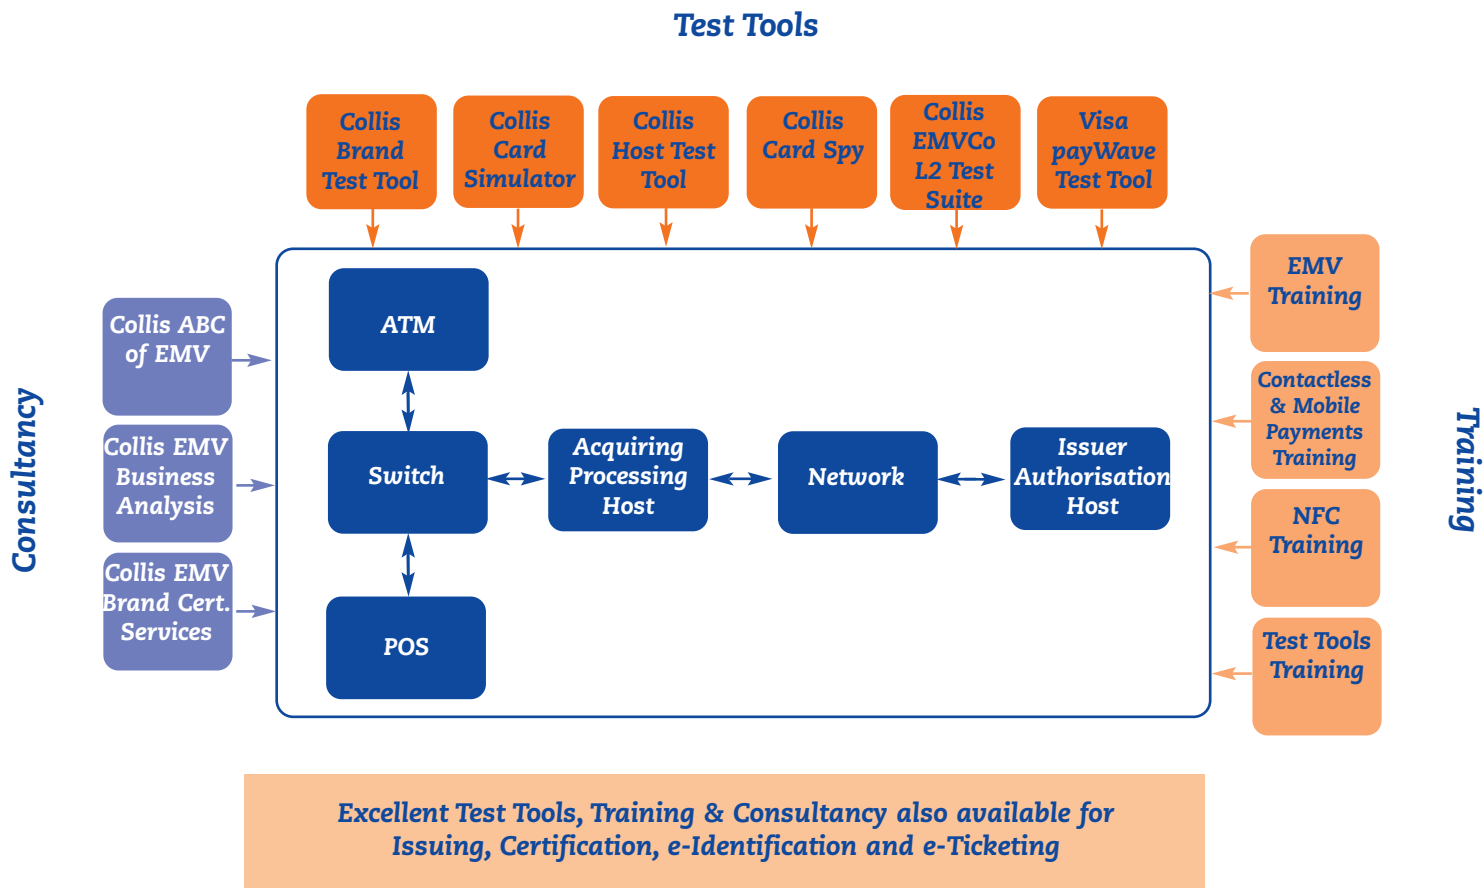

Training courses ranging from in-depth EMV Training, Contactless and Mobile Payments Training as well as courses on the use of Collis Test Tools on offer, ensure that the latest and most practical knowledge is at your fingertips.

See overleaf for an overview of Collis Products & Services for Acquirers.
