

Introducing Collis SWP and HCI Test Suites!

Leiden, the Netherlands 1st September 2010: Collis is delighted to announce the launch of the Collis SWP & HCI Test Suites. A must have set of tools for mobile network operators and card vendors.

Collis SWP and HCI Test Suites are an innovative set of tools to test the compliance of SWP enabled devices based on the most recent ETSI specifications. The suites for handset testing are based on ETSI TS 102 695-1 & TS 102 695-3 and for UICC testing on ETSI TS 102 694-2. Collis SWP and HCI Test Suites include a fully-functional, scriptable test environment. All system functionality and API's are fully documented. The test suites provide an excellent debugging and development platform. They also consist of a collection of scripts sufficient for modifications and additions to be made by developers and testers.

The Collis SWP and HCI Test Suites combine all of the benefits of Collis' easy-to-use approach with Collis Test Manager. The Collis Test Manager consists of a user-friendly Test Management Application with the powerful Conclusion Test Engine and provides a logical path in creating & managing an entire test project. Users of the Collis SWP and HCI Test suites will now be able to configure test execution and report results in a flexible manner.

Collis has been offering market leading test tools, consultancy and training for the mobile telecommunications industry for over a decade. Our test tools are used by card and handset manufacturers to develop and test products as well as by mobile network operators to test interoperability. These tools use flexible Java APIs that take testing beyond standards conformance.

Berend van Geffen, Chief Commercial Officer, Collis comments: "We are extremely pleased to launch this great product into the mobile telecom market. Collis SWP and HCI Test Suites are must have test suites which ensure high level of compliance and interoperability of your SWP enabled devices. Collis aims to deliver state-of-the-art test tools which ensure quality, optimise efficiency and reduce resource investment as well as time-to-market. This is precisely what Collis delivers for network operators and card vendors with the Collis SWP & HCI Test Suites."
