

Visa confirms GCCV implementation

Collis announces today that Visa has confirmed the GCCV implementation for use in connection with Visa Inc. programs in the Collis EMV Personalisation Validation Tool (EMV PVT). The Collis EMV PVT gives you reliable quality control over the personalisation process. As a Card Issuer or Personalisation Bureau, you can ensure that your cards have been developed according to the mandatory card personalisation regulations from the payment associations. Contactless Mobile Payment

ING and MasterCard® Worldwide announce the first program to offer ING Romanian clients a complete mobile payment package - the ability to set up payment capability, make transactions and feed their accounts - all using their mobile phone. The product is based on Maestro® PayPass™, a MasterCard contactless payment product designed for small purchases. ING and MasterCard Worldwide developed the product in partnership with Collis, Toro and Venyon. [Click to read the Press Release.](#)

EMV Chip Testing and Certification

Global Payments has selected Collis/B2PS to provide EMV Chip testing and certification tools for its Point-of-Sale payment solutions in Canada. Collis' testing platform provides Global Payments with the ability to validate the functionality and performance of Canadian card payment networks' contact and contactless cards on its solutions. Utilizing the Collis platform, Global Payments is also able to test International cards that may circulate with the expansion of EMV Chip in Canada. [Click to read the Press Release.](#)

Collis Card Spy wins Award

The Collis Card Spy Test Tool received the Lorne Boates Award from ACT Canada for product innovation during the Cardware conference in Canada in October. This award was established to honour the first Executive Director of Act Canada Lorne Boates Recipients are nominated for their achievements in the development of an outstanding new technology and/or application using advanced card technologies. [Read More about Collis Card Spy.](#)

New Managing Director of Collis Services

Collis is very pleased to welcome Maurik Hellebrekers as Managing Director of Collis Services. Maurik brings with him years of experience and expertise in the Services Industry. For the last 10 years Maurik was working for Oberthur Technology as the Business Director for the Benelux and Germany.

Aspects Tools launches Tool Box 1.0

In November, Aspects launched Tool Box 1.0, their new suite of tools for testing and spying on the interface between a mobile handset and a (U)SIM card. Tool Box introduces a more flexible way to buy test tools: first select the tools and then select the technologies they need to support. As well as the ISO (3G and GSM) testing and translation that Aspects is known for, Tool Box introduces CDMA translation and adds support for SWP/HCI. [Read More about Aspects Tool Box.](#)

Collis e-Ticketing EOD Tool

The EOD (Equipment Operating Data) Product Toolbox is being developed for RET, the public transport operator of Rotterdam, NL. This tool is used to manage the product parameters for the RET e-Ticketing system. The EOD Tool makes it easier for RET to create new products and maintain the product related parameters in the e-Ticketing system. [Read More about e-Ticketing.](#)

EMV Consulting for Brazilian Card Issuers

Collis America provided on-site Executive and Expert EMV training to Hipercard in Sao Paulo, Brazil. This training was well attended by key managers and staff who are responsible for spearheading Hipercard's EMV Migration efforts. Collis leveraged a cross-functional team of business and technical consultants in order to deliver the gap analysis and training. The Collis EMV Gap Analysis consulting package is a popular package for customers world-wide. [Read More about EMV Consultancy.](#)

Payment Terminal Testing for Users with Handicap

The Collis Test Centre performed research for Viziris on the user friendliness of payment terminals (POS). The Test Centre was responsible for defining of the test cases, the technical assistance and the execution of a lab test with 55 people from 11 different groups with a handicap. The results showed that every POS needs improvement for a wide group of (disabled) and amongst others were presented at ING for a wide range of stakeholders. [Read More about Terminal Testing.](#)
