

Collis Card Image Editor

The Collis Card Image Editor enables you to create different images of cards and simulate cards you do not have physically. Easy-to-use, it focuses on 'virtual images' of EMV cards and you can test how it works with your terminal, host and network switch. The Card Image Editor provides an intuitive GUI for editing card data elements defined in MasterCard, Visa and other EMV-based card specifications. You can also develop multi-application cards, reduce the number of iterations of producing physical cards and easily create of a proprietary set of (simulated) cards for terminal testing. NFC and Mobile Payments

Maarten Bron, our leading industry expert in the Payments Arena gave an extremely well received presentation at the Nordic Card Markets Conference in Stockholm, Sweden in January. He spoke about the latest developments and innovations in NFC and Mobile Payments. Maarten elaborated on using NFC technology in conjunction with new mobile phone applications and the problems posed and overcome in mobile payments and NFC. [Read more](#) about Collis NFC & Mobile Payments offering.

Collis opens new office in France

In early January, Collis opened their French office in the heart of Paris. Our French customers will now have a local point of contact for Collis Products & Services. We are currently implementing support for the French CB-EMV standard in our products. Please contact [Kevin Murphy](#) at our French office for more information. EMVCo Qualifies the Collis CPA/CCD Test Suites

EMVCo has recently qualified Collis' Level 2 CPA Test Tool and Level 2 CCD Test Tool for Card Products. These tools are part of the Collis CPA/CCD Test Suites. CPA & CCD specifications and definitions are designed to facilitate chip migration and reduce interoperability issues over time. The Collis CPA/CCD Test Suites are the perfect solution for testing CPA/CCD compliance for certification. [Read more](#) about Collis CPA/CCD Test Suites.

SEPA Services

Collis offers consultancy & support for all EU banks migrating to the SEPA framework. Collis consultants have SEPA experience as well as extensive testing experience so you can be sure that the SEPA migration process is swift and successful. Collis also offers a range of SEPA-related consulting services to help you to determine a test and certification strategy that is tailored to your organization, to implement and execute a compliance test program and to deliver a working, fit for purpose, ISO 20022 implementation. [Read more](#) about Collis SEPA Services.

Aspects Tools Conformance Statement

Aspects Tools has lodged a new test platform with the global Certification Forum (GCF). Test platform 93 is a USAT testing platform that combines Aspects SmartStation3, Aspects Test Suite 31.124 and Anritsu's MD8470A network simulator. The announcement demonstrates Aspects' commitment to the conformance market. Work to submit both the off-line and on-line test cases as required under GCF WI-35 is ongoing. Integrations of Agile and Traditional Testing

Collis continues to be active in the testing arena on an international scale and on the 29th of May Derk-Jan de Groot will speak at the Annual Software & Systems Quality Conference being held in Dusseldorf, Germany. He will present a framework for implementing test improvements and adapting test processes at the conference. [Read more](#) about Collis Test Services.

e-Driving License Test Toolkit

Collis will demonstrate the 1st proof of concept of the e-Driving License Test Toolkit during the seminar following the ISO WorkGroup 10 meeting in Singapore next week. The e-Driving License Test Toolkit implements ISO 18013 Part 4 test methods and validates the conformity to ISO 18013 parts 2 & 3. For more information [contact us](#).
