

MasterCard accredits Collis for training and consultancy

Collis is delighted to announce its successful completion of the MasterCard Chip accreditation program to provide chip-related training courses and consultancy services to both issuing and acquiring banks and other companies involved in the payment industry. The MasterCard accreditation acknowledges the high quality of the services Collis pursues to leverage the business of its customers. [Read more.](#)

New online demonstrations of Collis Products!

Collis is pleased to offer new and existing customers the opportunity to view our products in action from the comfort of their own office. These demos are aimed to give customers a sneak preview into their capabilities and ease-of-use. Among the available demos are Collis EMV Personalisation Validation Tool, Collis Brand Test Tool, Collis Card Image Editor and more. [Click here](#) to view our demos.

Collis adds French CB ("Carte Bancaire") card validation to Collis EMV PVT

Collis has implemented a new module for French CB contact cards in the Collis EMV Personalisation Validation Tool. This new CB "Carte Bancaire" Module in the Collis EMV PVT covers the Groupement des Cartes Bancaires card personalisation specification. This new implementation together with our new French office earlier this year confirms Collis' commitment to the French market. [Read more.](#)

Collis and CETECOM ICT Services contracted to develop VDV-KA Test Tools

Collis and CETECOM ICT Services have been contracted by the VDV-Kernapplikations GmbH & Co. KG to develop VDV-KA Test Tools and to operate the VDV-KA Test Lab. This Test Lab will test the compliance of all core application (KA) systems with the German e-Ticket standard which has been defined by VDV (Association of German Transport Companies). New Business Unit announced: Collis Health

The Health Market in the Netherlands (and indeed worldwide), is undergoing a lot of changes. Smarter solutions based on available IT knowledge and systems are essential to achieve cost reductions and have an affordable and sustainable Health Care System in the coming years. To address these needs, Collis is proud to establish its new Business Unit: Collis Health. For more information contact our Collis Health Business Unit Manager: [William Rolvink](#).

Moving your Contactless/NFC projects forward

With Contactless initiatives and NFC technology gaining momentum around the world, Collis is proud to announce a full suite of products and services for contactless and mobile NFC technology covering: detailed in-depth [courses](#) for architects and engineers; state of the art [test tools](#); [Consultancy services](#) for program implementations. Check out our [brochure](#) or contact [Jan Dart](#), Senior Consultant.

Trends in the Payment Market

Despite the turmoil in the financial world there are still business issues which need to be addressed. This is two folded. 1) Business critical issues like SEPA compliancy and Fraud and 2) interest in new technologies like contactless and mobile payments. Collis is delivering its knowledge and products to several customers and projects. For more information [click here](#).

Aspects Tools Releases Tool Box 1.2

Tool Box 1.2 is a major upgrade to Aspects' suite of mobile test tools and improves spying and card testing. Aspects Spy benefits from two new views: BIP, which shows data moved across BIP channels, and card emulation. Tool Box 1.2 also introduces specification information in the interface to remove the need for separate reference documents. [Read more.](#)
