

Brand New Website: www.collis.nl

Visit www.collis.nl for a fresh overview and greater insight into our consulting services, training courses, testing tools and testing services.

Images of ants are used on the website to represent and highlight some of Collis' key traits such as hard work, dedication, result-driven and customer oriented focus as well as our great team spirit.

Global Projects Highlight

EMV in the Desert

Wilbert Koumans, Collis EMV Consultant, is gearing up the EMV program for the chip migration of a major bank in the Kingdom of Saudi Arabia; acquiring and issuing activities for debit and credit.

Collis adds value to this project through our experience in EMV chip migration projects and the work that Collis has been doing for the local domestic debit scheme.

EMV for Electronic Road Pricing

In June, Collis has started working on an application for Chip Authentication Program (CAP) / Dynamic Passcode Authentication (DPA) in a new industry: ETC (electronic toll collection) used for tolling stations.

Collis is re-engineering CAP/DPA in a way that the ETC function can be added to any standard EMV chip, but is fully capable of operating in the ETC environment (extremely high transaction speed!). In this way, card issuers can generate thousands of new transactions in a new cardholder segment, basically at no additional investments from a chip perspective.

EMV Personalisation Validation Tool

EMV migration from a magstripe to a chip infrastructure is the current hot topic for the financial industry, worldwide. Collis offers a series of cutting edge, in-depth EMV chip personalisation and validation testing tools to cater to increasing customer demands. Collis' EMV testing tools check the security and data integrity of EMV cards.

Use Collis' EMV Personalisation Validation Tool (PVT) testing tool for reading emv cards and testing the results. EMV PVT is a powerful tool that simplifies quality control in the personalisation process. This easy-to-use testing tool is a must for any personalisation bureau or card issuer.

Special versions of the EMV PVT are available to check Contactless Cards; both EMV and Magstripe. For instance for VisaWave, Visa MSD and MasterCard PayPass. The EMV PVT works with the Conclusion Test Platform to provide the most powerful EMV personalisation testing tool available.

For more information on Collis' EMV Testing Tools and Services visit: www.collis.nl/products/emv

Another Satisfied Customer!

"It is very important to ensure the quality of personalised cards.

Collis EMV Personalisation Validation Tool (EMV PVT) provides easy-to-use and comprehensive functionality for different EMV cards verification, giving high confidence in results obtained.

We are convinced our customers will appreciate superiority of TietoEnator Card Suite combined with benefits given by excellence of Collis' EMV PVT".

Kristine Spakovska
Marketing Communications Manager
TietoEnator Banking & Insurance

Further information is available at: www.collis.nl/emv/academy

News & Announcements

◆ Collis' ADVT Issuer Host Simulator is fully capable of emulating the Host requirement's for the Visa ADVT (Acquirer Device Validation Toolkit) online cards. ADVT Issuer Host Simulation is part of Collis' EMV Terminal Toolkit that can be used for end-to-end testing of POS devices and ATMs. With this toolkit, terminal vendors, processors and acquirers can speed up the introduction of ADVT compliant terminals and host systems.

◆ Collis is now an approved provider of MULTOS Interoperability Testing Type Approval Services. Collis will provide both Pre-mask and Post-mask Type Approval Services. The integrated combination of Collis' MULTOS Interoperability Testing Platform and Collis' Interoperability Testing Type Approval Services ensures a fast and efficient response and reduces time-to-market.

◆ Collis is pleased to announce that it has joined the Advanced Card Technology Association of Canada (ACT Canada).

Collis has won a bronze award for being one of the best employers in the Netherlands in 2006!

Collis welcomes Berend van Geffen as the new Sales Director for Collis
