

PRESS RELEASE

Collis Releases Aspects Tool Box 2.3!

Leiden, the Netherlands 1st September 2010: Collis is pleased to announce the release of Aspects Tool Box 2.3.

Collis is pleased to announce the release of Aspects Tool Box 2.3. Aspects Tool Box 2.3 is the suite of tools for spying and testing (U)SIM cards or mobile handsets. Tool Box contains all of the tools you need to be able to test the most simple function right through to the most complex of test situations. You can choose to run pre-written test cases or you can develop your own test cases using the integrated simulation and scripting tools contained within Tool Box. Based on the tasks you need to perform, you chose the tools you need.

Aspects Tool Box 2.3 sees the launch of our new handset test platform for the testing of cmda2000, UMTS and GSM handsets.

Aspects Tool Box 2.3 includes the following updates:

- A new Smart Card Web Server (SCWS) view has been added to Aspects Spy to display the HTTP commands exchanged during a SCWS session
- A new translator has been added to Aspects Spy for the cdma2000 CSIM application
- The existing ISIM of translation has been improved in Aspects Spy
- Modules for USIM, CSIM and ISIM application have been added Aspects Handset Test Platform to complement the existing RUIM and GSM support. This is now provides a single platform for the testing of GSM, UMTS and cdma2000 mobile handsets
- Various API improvements in Aspects Handset Test Platform

Collis has over a decade of experience providing both hardware and software solutions to all areas of the mobile telecommunications industry, including network operators, handset manufacturers and smartcard (SIM and USIM) card manufacturers.

Berend van Geffen, Chief Commercial Officer, Collis comments: "We are pleased to release this latest version of Aspects Tool Box. Collis is actively focused on the development and promotion of solutions designed to simplify spying and testing (U)SIM cards and mobile handsets. As an independent solutions provider, Collis is committed to providing test solutions that enable the UICC, the handset and the network to all work properly together."
