

Reference Sheet - Eastern Europe

“Collis’ EMV PVT helped us to **rise the quality of the products**. That is the biggest benefit gained since we started to use the Collis product.”
Tonu Ots

Hansabank/Swedbank (Estonia)

“The Collis EMV PVT is considered a **critical tool** used to verify any EMV contact or contactless card products BZWBK are offering. The card certification processes Visa and MasterCard require are always preceded in BZWBK by testing the cards with Collis PVT. If the tool verifies it correct then we are sure the Visa/MasterCard card certification is a **simple routine** and no bugs will be found in the EMV profile. This 'being-sure' about the card EMV contents is **invaluable!**”

Krzysztof Kazmierski

BZ WBK (Poland)

“With the Collis Host Test Tool we could manage the complexity related with testing and interacting with 3rd parties. It also helped streamlining our IT project management.”

Simone Tettamanti

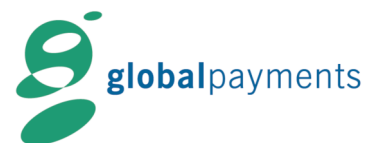

Cornèr Banca (Switzerland)

“The Collis solution provides true card simulation. The platform emulates all the functions of an actual EMV Chip card and helps Global Payments deliver **highly reliable, compliant EMV Chip products** that will have longevity in the marketplace.”

Jamal J. Awad

Global Payments (Europe/Canada)
